## Introduction

HiPath optiPoint 500 Fact Sheet

The new award winning optiPoint series of digital telephones support the HiPath communication platforms and are available for immediate delivery.

## The optiPoint 500 range

### HiPath optiPoint 500 Fact Sheet

#### HiPath optiPoint 500 Entry

This is the most cost-effective telephone within the range. It is ideal for the adoption of digital telephony with minimum usage requirement. The telephone has 8 function keys and offers loudspeaker capability.

##### Features:

- Open-Listening
- Message Waiting Lamp
- 8 Function keys
- Ringer and Handset Volume

#### HiPath optiPoint 500 Economy

The first display telephone within the range is the optiPoint Economy. It provides digital telephony with LCD display and open-listening functionality and ensures that we provide our customers with a highly functional and superbly styled workpoint for every requirement.

The optiPoint 500 economy is priced at £90, normal discounts apply.

##### Features:

- Open-Listening
- Message Waiting Lamp
- Ringer and Handset Volume
- 12 Feature Keys
- LCD Display

# The optiPoint 500 range

### HiPath optiPoint 500 Basic

The optiPoint 500 Basic is the ideal telephone for normal telephony requirements within an office environment, having the advantage of a USB interface to allow data communication alongside digital voice communication.

#### Features:

- Open-Listening
- Message Waiting Lamp
- 12 Feature Keys
- Ringer and Handset Volume
- LCD Display
- Key Module
- Adapter Plug-in
- USB Interface

### HiPath optiPoint 500 standard

The optiPoint 500 Standard is ideal for staff who require more than the generic telephony functions and who also wish to have the flexibility of handsfree capability.

#### Features:

- Open-Listening
- Handsfree
- Message Waiting Lamp
- 12 Feature Keys
- Ringer and Handset Volume
- LCD Display
- Key Module
- Adapter Plug-in
- USB Interface

## The optiPoint 500 range

### HiPath optiPoint 500 Fact Sheet

#### HiPath optiPoint 500 Advance

Top of the range telephone suitable for extensive telephony users, who demand comprehensive capabilities.

- Open-Listening
- Handsfree
- Message Waiting Lamp
- 19 Feature Keys
- Ringer and Handset Volume
- LCD Display
- Key Module Adapter
- Plug-in USB Interface

#### HiPath optiPoint 500 USB Port- CTI Solution- Callbridge TU

TU stands for **TAPI USB** and with it, you can use the USB port provided by the new **optiPoint 500 Basic, Standard and Advance** telephones to provide a low cost 1<sup>st</sup> party CTI solution for applications such as dialling from Microsoft Outlook or screen popping from other TAPI compliant applications.

#### USB Connection Features

- USB Cable connected via optiPoint to users PC
- Cable end user price £16.80 (P/N L30250-F600-A155)
- optiPoint 500 Economy and Entry has no USB port

#### Outlook Dialling 'Out of the box'

The most commonly requested application for 1<sup>st</sup> party CTI is the ability to dial from numbers stored in a users outlook address book and Callbridge TU provides this out of the box. To implement Outlook dialling, only two items are required; the CallBridge TU software and the USB Cable.

## The optiPoint 500 range

HiPath optiPoint 500 Fact Sheet

### **Screen Popping from Outlook Integration with other TAPI compliant applications**

Callbridge TU is in essence a TAPI Driver or service provider. It will therefore integrate with 'TAPI compliant' applications, but please note that to achieve this integration, middleware such as that from ARC solutions may be required.

As a general point, it should be noted that some TAPI compliant applications are more compliant than others and Siemens recommend bench testing before installation at a customers site.

### **Where can I obtain Callbridge TU software?**

Callbridge TU software is available **free of charge** from the [hipath.com](http://hipath.com) website.

The download provides a full installation and set up guide.

The route is:

- [hipath.com](http://hipath.com)
- downloads
- software
- TAPI Drivers and CSTA information
- TAPI service provider (1<sup>st</sup> Party) Callbridge TU
